JOÃO GABRIEL DA ROCHA DA SILVA

Full Stack Developer

Rio Grande do Sul, Brazil | joaogabrielrocha.dev@gmail.com | linkedin.com/in/slpjg | github.com/JGabriel02

SUMMARY

Full stack developer with a degree in Systems Analysis and Development, currently pursuing a Bachelor's in Computer Science. I build complete web applications with REST APIs, Java (Spring Boot) and C# (.NET) back ends, React and Angular front ends, SQL databases, automated tests and continuous integration. For over 2 years I have worked in a corporate environment supporting and maintaining applications, documenting requirements and running acceptance testing, and I put a Google Apps Script automation integrated with Slack into production. I use generative AI daily to debug code and keep documentation up to date.

PROJECTS

NpcForge - Web application for RPG game masters

C#, .NET, ASP.NET Core, Entity Framework Core, PostgreSQL, Angular, TypeScript, JWT, Docker | github.com/JGabriel02/npc-forge

- REST (JSON) Web API with ASP.NET Core Identity and JWT authentication and an Angular front end, with optional NPC generation by a local AI model (Ollama).
- Automated tests with xUnit and Testcontainers, Docker Compose environment, and a web version published on Azure with automated deployment.

GEJE - Construction ERP/CRM (in development)

Java 21, Spring Boot, Spring Modulith, Angular, PostgreSQL, Flyway, Docker, GitHub Actions

- Modular monolith with module boundaries enforced by automated tests, versioned Flyway migrations, and a CI pipeline for back end and front end.

Vacation Scheduler - Vacation Booking

React, TypeScript, Java, Spring Boot, Spring Security, JWT, PostgreSQL

- Responsive full stack application with JWT authentication, role-based access control, and business rules validated on the back end.

Automated Shift Handover (Google Apps Script)

JavaScript, Google Apps Script, Google Sheets, Slack

- Dashboard and web app integrated with Slack in production, automatically posting the shift summary at fixed times after team validation.

PROFESSIONAL EXPERIENCE

Monitoring Analyst | Stefanini

12/2023 - Present

- Application support and maintenance in a corporate environment, handling priority P1 incidents and diagnosing failures.
- Monitoring and reprocessing of RPA jobs, handling about 600 incidents/alerts per month with an average resolution time of 10 minutes.
- Gathering and documenting requirements and procedures with user teams, plus functional testing and acceptance before deployment.

EDUCATION

Bachelor's in Computer Science | Senac RS

08/2026 - Present (in progress)

Systems Analysis and Development (Technologist degree) | Senac RS

03/2022 - 12/2023

SKILLS

Java, Spring Boot, C#, .NET, ASP.NET Core, Entity Framework Core, JavaScript, TypeScript, Python, React, Angular, HTML, CSS, REST APIs (JSON), SQL, PostgreSQL, MySQL, Object-Oriented Programming, SOLID, Automated testing, Git, GitHub, GitHub Actions (CI), Docker, Azure (deploy), Google Apps Script, Process automation, Generative AI, Scrum, Kanban

CERTIFICATIONS

- C# Fundamentals - Rocketseat
- AWS Academy Graduate - AWS Academy Cloud Foundations - AWS
- Java Back-End Development Checkpoint - Level 1 - Alura
- Git and GitHub: repositories, commits and versions - Alura
